

## Construction updates

Bering 65 *Golden Mile*, the third hull in Bering's 65 Expedition range of yachts, is nearing completion. After several months of fairing process the finish primer application created a superb underlying foundation prior to her final top-coat application.

The personalized interior design features hand crafted walnut furniture combined with high quality soft fabrics and Sivec white marble for the en-suite heads.

The new build Bering 70 *Apsara* is also taking shape at the the Bering Yachts facility in Antalya, Turkey. Featuring a steel hull and an aluminum superstructure, she has been designed with the Mediterranean coastal cruising lifestyle in mind.

Large glass panels surrounding the saloon and galley on the main deck create a refreshingly open and airy feeling aboard. The lower deck features 3 en-suite staterooms and her owners opted for a light, minimalist interior which will resemble a beach house design.

## Designer comments on new Bering flagship B130

Bering 130 has been developed in association with SABDES Design to be a superb transoceanic yacht, ready to take on the heaviest of seas with grace and efficiency due to a tall bow profile that provides the requisite buoyancy to rise up and over approaching swells.

"We decided on softening the 130's look compared to the more military sharp styled 115 footer, by rounding all her superstructure corners and go for a more 'yacht style' look, yet owing to her high freeboard she still retains the same very muscular presence of the 115'. " stated Scott Blee of SABDES Design.

Scott explains that explorer yachts are quite dear to his heart "I love the vessel size that allows very low crew numbers to manage them, yet still have no holds barred, go-anywhere capability, and if I can make them also look pretty tied up at the marina, then that's all the better!"
